SecureBIKEtag- Bicycle Tag VIN System:

Includes 1 High Security Tag w/Brass Grommet, 1 Stainless Steel 6" Aircraft Quality Security Cable, 5 Water-Resistant Tags and 1 Adhesive Plastic Sheet, Wallet Card, Free Lifetime Tracking and More!

Instructions: Attach the laminated RFID tag to your bike using the stainless steel cable. Pick a strong attachment point on the frame. Tighten screw attachment with pliers. For permanence add a drop of super glue. Fully clean the locations where you intend to attach the surface tags. Remove all dirt and grease or the tags will not stick properly. We recommend placing the white surface tag where it would be visible to law enforcement and using the adhesive sheet over that label to protect and secure it. This will make it much harder to remove. Peel backing paper off the silver polyester surface tags and attach to important bike parts. Try to hide a few of the silver surface tags in locations a thief is not likely to find. Place laminated wallet card into your wallet or purse. Go online to our Secure SSL site: www.blueplanetsecurity.com and register your tags. Thank you for your purchase. Also visit secureBIKEtag.com and see bike.BPPRN.com.
We also recommend ENGRAVING this number and BPPRN.com on your bike.
